These limes have been tested by experts, and found to be Superior to any other found in China. All houses should be lime washed

with this lime. It gives an odour of sweet-

ness and kills vermin. It is a decided check on Plague and other postilent discuses,

and it is invaluable for Building Purposes, being been tested and found to give 60 to 10 lbs to the square inch breaking strength.

is neved for its promptness of action. It imparts tone to the organs, re-establishes normal functions and arouses vigour and vitality. It strikes at the very root of illhealth by building up nutrition, whereby new tissues are formed to replace those diseased and destroyed. It improves the appetite, stimulates digestion and enables the system to obtain its full quota of strength and flesh from the food. It enriches the blood and tones up the nervous

system. These are no random statements

but definite certainties.

Therefore, Stearns' Wine of Cod Liver Oil is justly denominated a powerful tonic and rehubber. It is invaluable in all depressed, rundown and ill-neurished conditions. Most beneficial in consumption, nervousness, dyspepsia, indigestion, scrofula, chronic coughs, rhouinatism, chronic neuralgias, lassitude, eczema, etc. It is of great service in old age, the change of life in women, and for weak and puny children. THE TRI-METRICAL OLASSIC

THE LOST 'CITY OF RIO.'

New Plan to Recover Her.

San Francisco, June 28. - 41though there shave been many unsuccessful attempts to recover the lost Rio de Janeiro, John Al Bower of Columbus, O., does not feel disheartened, but shows that he has the counge of his convictions by bringing to this city all the way from the Eastern states a new device for exploring the depths of the sea. The new diving and wrecking machine is the invention of C. D. Myers, and has been recently tested in Lake Huron. It arrived yesterday morning and will be put into working order as soon as possible. A specially constructed boat is being made to carry the machine about, and from this boat it will be operated,

The apparatus is designed, said Bower, in discussing the matter yesterday, 'to operate in the deep sea to the depth of 2000 fathoms. It is supplied with an electric scarchlight, with which, in Lake Huron, the operator was able to see more thin half a mile through the water. He has freedom of motion in a space twenty feet square, plenty of fresh air, is free from pressure and in communications with the surface by water in Lake Huron for two homs and a half and experienced no inconvenience, The upper part of the appearing is a chamber calculated to resist 2,500 pounds pressure. It will float, having a displacement of 4,500 pounds and weighing about 3,000 pounds. The lower part is a detachtable base of nearly solid metal, which acts as a sinker, overcoming the buoyancy of

A mechanical arm is arranged on the side of the machine, of such delicat; mechanism that the operator within can pick up with it an object as small as a lead pencil as wellas clutch and lift a weight of 800 pounds The principal use of this arm is to make attachments of grapples with which to lift heavier hodies.

Looking for the Rio de Juneiro will be like carrying a great lantern around the scabottom, only the man will be inside the lantern. We purpose to find the sunken vessel and if possible to raise it.

Many people seem disposed to look upon the enterprise with incredulity,' Bower conchided, 'but because a thing has not been done already it is not necessarily impossible. It is the man who does what others cannot do who does something worth while,

PEKING POLITICS.

The Deposition of the Emperor.

A Mandarin of high rank temporarily residing in Shanghai ims received the following communication from a friend in Poking (says the N.-O. Daily News) :- It is believed by a large majority of people connected with the various Boards here that the Emperor's opponents are again trying to revive the question of the deposition of His Majesty from the Dragon Throne, the Emperor's principal enemies being the Grand Secretary Yung Lu and the notorious favourite sunuch of the Empress Dowager, Li Lien-ying. Since Yung Lui's added celat obtained by the betrothal of his daughter to Prince Chun, the Emperor's younger brother, and that of his (Yung Lu's) niece to Prince P'u Lun, 4th Order (' Lun Pei-tzo' as : ho is generally Mr May moved the adoption of Report | styled), who is the legal Heir to the Throne by right of juniority of descent, that being made good out of the revenue of the but also officials and the masses into submission. He has the Empress Downger to keep the princes and nobles in subjection; he himself and the infamous cunuch, Lir Lien-ying--who alone can count hundreds of officials of all ranks throughout the country who look up to him as their sponsor and protector. hope to keep mandariadom in order; but the last and by no means the least measure, namely, the subjection of the army and the masses to his doposition scheme, it is generally believed in Peking, has been attained by the arrival at a secret understanding with China's dominant neighbour on the Northern frontiers. It is this last which, according to the Peking communication in question, is greatly disturbing the minds of all thoughtful men. For the powerful assistance which will be required to protect the Grand Secretary and his friends from those who are loyal to the Emperor, the powers that be have consented to place Tibut, under the protect tion of Russia, which is another way of

Sir. - Permit me to invite your littention to the subjoined letter which appeared in the London and China Telegraph of 12th May, with reference to the disparity be tween the London and China value of Bank shares, and animadverting on the preferential treatment of the London shareholders by issuing dividend wrriants free of income tax, but withholding that privilege when shareholders on the China

register, resident in England, receive their dividends through the London office in Now when the income tax was only 2d. in the pound and exchange high, it was no great burden or loss to the Chinese shareholders to have to pay the income tax of the London shareholders, for that is what it amounts to, but since exchange has fallen and the tax risen to 1s. 2de and likely to be increased this year to is 3d; in the pound, concurrently with a further drop in silver, the latter rate of income tax on ing of a Bill entitled 'An Ordinance to a \$3.10.0 dividend, paid by the Bank The for the holders of say 40,000 shares onthe London register, represents a sum ern boundaries of Victoria in order to in- of \$100,001; in other words a loss of \$1.25 per share on the 8\,000 shares of the Corporation, or \$2.50 per share by which the 40,000 shares remaining on the China register are mulet in order to defray the

income tax on behalf, of the London share-Perhaps you will be good enough to ventilate this matter, and urge the China shareholders to move the Directors of the Bank to accord the Eastern shareholders the same advantage as granted to those in London in the unitter of dividends received in England, or compensate those on the China register for loss and disabilities incurred by this preferential treatment of the London shareholders. The following is the extract referred

In Messrs J. A. Sullivan and Co. s

Shanghai Share Report of March 26th. between the China and London value of Hongkong and Shanghai Banking Corporation shares, the difference then being no less than \$128, or say 1s. 9d., equal to £11 4s, per share in favour of London. This serious disadigratage under which shareholders on the China register labour is now intensified by the fact of the Treasury and Income Tax. Office having called upon the Bank to furnish a returnof dividends paid in London to shareholders on the China register, which renders them liable to deduction for income tax, and such shareholders, though not domictled in the United Kingdom, have been called upon by surreyors of taxes to pay current as well as arrears of income tax. Whether the Bank was right in giving the Trousury the names of shareholders on the China register receiving dividends in London is for the shareholders to investigate and contest; but having disbelosed the amount of dividends received. with their names and addresses, it seems only fair and reasonable that the unfortunate China sharcholders' should at least be put on the same footing and enjoy the same advantages as the privileged few onthe London register, and, similarly, receive their dividends when paid in London freefrom income tur. It is to be hoped the China shareholders will agitate this point and maist on participating in all the bonefits and immunities resped by the shareholders on the Landon register.
